EXPERIENCE (6.5 years)

Harman (Senior Software Engineer) – (Java, C#, Infrastructure).

April 2014 – August 2020

- Developed log collector and analysis modules using Elastic Search and Logstash to integrate it with Marimba as well as standalone product for new customers.
- Developed Android modules for device management and FOTA update using Marimba Stack that allowed our team to get new clients and target new mobile management domain.
- Developed low-cost proxy server and ported Marimba components on Linux ARM embedded platform that allowed our team to pitch our new IOT products to our old customers.
- Lead internal teams (Infrastructure, Discovery, Targeting and Patching) to implement latest security standards TLS1.2 (Java SSL from RSA SSL implementation) with backward support.
- Owned resolution tasks/escalations/defects/RFEs from support team, provided technical trainings, POCs and conducted many interviews for Dev/QA/Support roles.

Udacity (Independent Consultant) – (Python, Pytorch).

October 2017 – Present

- Mentor for Deep Learning Nanodegree where I guide students online and review their submission for TV script generation project using Recurrent Neural Network.

Topcoder (Opensource Contributor) – (Python, Shell Scripts)

August 2016 – October 2016

- In series of paid challenges from OpenWARP, I have created installer for Windows, Mac and Linux and created test scripts to test their geometries by porting third party libraries, bug-fixing, and documentation

PROJECTS

- [Drone Computer](#) [Python, C++] - Motion Planning, Estimation and Control module of drone computers
- [Final Year Project](#), Bachelors [C#/.NET] - Developed a genetic algorithm to solve Travelling Salesman Problem
- [Face Mask Classification and Bias Analysis](#) [Python, Pytorch] – implemented using Convolutional Neural Network
- WaxTree [Firebase, Android] - An Anki app to create, save, share notes created using No SQL data models.
- Process Monitor Service [C#/.NET]- A windows service to monitor a process and kill/restart it if unresponsive

SKILLS

LANGUAGES: Python, Java **FRAMEWORKS/TECHNOLOGY:** SQL, NoSQL, Apache Spark, AirFlow, AWS tools

CORE COMPETENCIES: Data Engineering, System Design, Algorithms, Design Patterns, Distributed Systems

EDUCATION

Concordia University, Montreal, Canada - *Master of Applied Computer Science*

Jan 2021 - Dec 2022

Staffordshire University, Panipat, India - *Bachelor of Technology, Computer Science*

Aug 2009 - May 2013

ACHIEVEMENTS

- Winner of Internal Hackathon and presentation [Harman]: awarded by Vice president, Pune
- Got outstanding performer of the year for Marimba team [Harman]
- Gold Medal Award (2013, awarded to the top candidates of the graduating batch)
